***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 5-7, 9-12, and 14-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fortin (5457898).

Fortin shows a shoe comprising a sole (12), a toe cap (15), an upper (14), and a metatarsal guard (11) with a convex arch/instep portion (shown in figure 1), and a right and complementary left leg (side portion which lead to the edge 13) as claimed. In reference to the limitation of “an integrally molded section rearward of the right and left support legs” which does not bear against the sole, Fortin clearly shows such at the location of the arrow from number 10 in figure 2 and also elements 21, 21', and 22. In reference to a “lip”, elements 16 are considered to be a lip which overlap the toe cap but which do not contact/bear on the sole as claimed.

***Allowable Subject Matter***

3. Claims 18 and 19 are allowed.

4. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments filed 6/12/06 have been fully considered but they are not persuasive.

In response to applicants' arguments directed towards Fortin, the metatarsal guard of Fortin is formed from a single layer of material. The fact that the single layer is folded over itself does not necessarily make it a plurality of layers, it is merely made from a single layer which is folded. This meets the language of the claims which merely recites the convex arch....comprising a single layer". Claims in a pending application should be given their broadest reasonable interpretation. In re Pearson, 181 USPQ 641 (CCPA 1974).

In response to applicants' arguments directed towards the width of the legs versus the width of the arch portion, see the marked up figures attached hereto. Inasmuch as applicant has defined and claimed such, Fortin shows such. Again claims in a pending application should be given their broadest reasonable interpretation. In re Pearson, 181 USPQ 641 (CCPA 1974).
